Coronasmarts: Brainy Entertainment for Kids of All Ages

Social:

Remember when we seemed not to have enough time? Now it's a challenge to fill it—especially if young children are in the picture. Find resources for smart solutions.

Meta:

Before anyone's brain turns to mush, check out free online resources for entertaining (and enlightening) kids of all ages.

Copy:

With so much time to fill, it's extra tough to keep kids occupied in ways that don't make you fear their brains are turning to mush (even if yours kinda feels that way, too). You can find scads of [lists](#) these days of [free](#) educational [resources](#) online, and here are a few highlights to get you started.

[PBS Kids](#)

What could be more comforting right now than the warm, familiar little paw of Daniel Tiger from Mr. Roger's Neighborhood, leading your littlest learners through a range of resources? It's the best of smart, sweet education.

[Crash Course](#)

A YouTube channel brought to you by John Green and Hank Green, Crash Course brings sneaky smarts to high school and college-aged students through videos and animations on . . . just about any topic you might want to learn.

[Google Arts & Culture](#)

Tour the world's museums even while they're locked up tight. Through one central hub, you can access art, history, and science all over the globe.

[Century](#)

Free in the wake of the coronavirus shutdown, Century is a neuroscience-backed educational method for guiding students of all ages through core topics.

[Adventure Academy](#)

Games and videos to help young learners with math, science, social studies, and reading, Adventure Academy also enables students to connect and collaborate so that they still get a sense of community.
